

To Whom It May Concern;

Mr. Jorge Ochoa has been teaching HealthRhythms Group Empowerment for adults and Tambofunction Drumming for special needs students for Northside Independent School District Adult and Community Education Program since 2009.

During the four semesters we have had classes, the reviews have been excellent. Parents of special needs students appreciate his ability to help their children express and demonstrate their skills. This is a positive experience for special needs children. The adult HealthRhythms classes are just as effective. One adult commented that “this was a unique experience that was an alternative form of stress reduction while satisfying musical interest”.

I would recommend Mr. Ochoa as an instructor as he has the ability to connect with all of his students.
